## SEA LICE COUNTS

Sensitive period <sup>4</sup>	Week 16 – 21
Lice levels	<a href="#">Click here</a>

## TREATMENTS

See BarentsWatch	<a href="#">Click here</a>
------------------	----------------------------

<sup>1</sup> Calculated at the end of the production cycle as: EUL = Stocking count – harvest count – mortalities – other known escapes.

<sup>2</sup> OIE is the World Organization for Animal Health.

<sup>3</sup> We do what we can to minimize our impact on wildlife, but unfortunately it may happen that we find dead birds or other animals in or near our sites.

<sup>4</sup> Sensitive periods refer to the outmigration of juvenile wild salmonids.
