SEA LICE COUNTS

Sensitive period ⁴	Week 16 – 21
Lice levels	Click here

TREATMENTS

¹ Calculated at the end of the production cycle as: EUL = Stocking count – harvest count – mortalities – other known escapes.

² OIE is the World Organization for Animal Health.

³ We do what we can to minimize our impact on wildlife, but unfortunately it may happen that we find dead birds or other animals in or near our sites.

⁴ Sensitive periods refer to the outmigration of juvenile wild salmonids.
