

# Mowi ASC report

| OVERVIEW   |                  |
|--|------------------|
| Business Unit  | Mowi ASA North   |
| Site   | Matvika          |
| ASC status   | Certified        |
| 1st certification Date                               | 26.04.2019       |
| Fish generation                                      | 2202             |
| Start of production cycle                            | 20.04.2022       |
| Date of last update                                  | 06.04.2023       |
| Wildlife Interactions - Birds                        | 0                |
| Wildlife Interactions - Mammals                      | 0                |
| Estimated Unexplained loss (EUL) <sup>1</sup>        | 2751 (2002 gen.) |
| Suspicious of unidentifiable transmissible agent     | None             |
| Unexplained mortality rate                           | None             |
| Detection of an OIE <sup>2</sup> -notifiable disease | None             |
| Number of escaped fish                               | None             |

## WILDLIFE INTERACTIONS

### BIRDS

| Date               | #        | Species | Cause |
|--------------------|----------|---------|-------|
|                    |          |         |       |
|                    |          |         |       |
|                    |          |         |       |
|                    |          |         |       |
| <b>Total Birds</b> | <b>0</b> |         |       |

### MAMMALS

| Date                 | #        | Species | Cause |
|----------------------|----------|---------|-------|
|                      |          |         |       |
|                      |          |         |       |
|                      |          |         |       |
|                      |          |         |       |
| <b>Total Mammals</b> | <b>0</b> |         |       |

<sup>1</sup>calculated at the end of the production cycle as: EUL = Stocking count – harvest count – mortalities – other known escapes

<sup>2</sup>OIE is the World Organization for Animal Health

<sup>3</sup>sensitive periods refers to juvenile outmigration of wild salmonids

average lice count (# mature females/fish)

## SEA LICE COUNTS

**Sensitive Period<sup>3</sup>** week 21-26

<https://www.barentswatch.no/fiskehelse/locality/30177/2020/40>

### Medicinal treatment

Weighted Number of Medicinal Treatments 1

### Parasiticide load

| Agent | Agent Name         | Parasiticide load |
|-------|--------------------|-------------------|
| 1     | Emamectin Benzoate |                   |
| 2     |                    |                   |
| 3     |                    |                   |
| 4     |                    |                   |
| 5     |                    |                   |

### Benthic parasiticide residue levels

| Agent | Agent Name | Residue level |
|-------|------------|---------------|
| 1     |            |               |
| 2     |            |               |
| 3     |            |               |
| 4     |            |               |
| 5     |            |               |
