

# MOWI® Mowi ASC report

| OVERVIEW   |                        |
|--|------------------------|
| Business Unit  | Mowi ASA Region Mid    |
| Site   | Bjørlykkestranda       |
| ASC status   | Certified              |
| 1st certification Date   | 14.04.2018             |
| Fish generation  | Spring 2019            |
| Start of production cycle  | 25.01.2021             |
| Date of last update  | 05.03.2021             |
| Wildlife Interactions - Birds  | 2                      |
| Wildlife Interactions - Mammals                                      | 0                      |
| Estimated Unexplained loss (EUL) <sup>1</sup>                        | G19= - 33 025 (-1,87%) |
| Suspicious of unidentifiable transmissible agent                     | None                   |
| Detection of an OIE <sup>2</sup> -notifiable disease                 |                        |
| IPM; non-medicinal measures applied (end of production cycle update) |                        |
| Number of escaped fish   | None                   |

| WILDLIFE INTERACTIONS |          |                                |            |
|-----------------------|----------|--------------------------------|------------|
| BIRDS                 |          |                                |            |
| Date                  | #        | Species                        | Cause      |
| 13.10.2019            | 1        | Seagull ( <i>Larus canus</i> ) | Accidental |
| 10.12.2019            | 1        | Seagull ( <i>Larinae sp.</i> ) | Accidental |
|                       |          |                                |            |
|                       |          |                                |            |
| <b>Total Birds</b>    | <b>2</b> |                                |            |

| MAMMALS              |          |         |       |
|----------------------|----------|---------|-------|
| Date                 | #        | Species | Cause |
|                      |          |         |       |
|                      |          |         |       |
|                      |          |         |       |
|                      |          |         |       |
| <b>Total Mammals</b> | <b>0</b> |         |       |

1) Calculated at the end of the production cycle as: EUL = Stocking count – harvest count – mortalities – other known escapes

2) OIE is the World Organization for Animal Health

3) Sensitive periods refers to juvenile outmigration of wild salmonids

4) Average lice count (# mature females/fish)

**SEA LICE COUNTS****Sensitive Period**3 Trøndelag og sørover - uke 16- uke 21, Nordland og nordover - uke 21 - uke 26[Barentswatch](#)**MEDICINAL TREATMENTS****Weighted Number of Medicinal Treatments****Parasiticide load**

| Agent | Agent Name | Parasiticide load |
|-------|------------|-------------------|
| 1     |            |                   |
| 2     |            |                   |
| 3     |            |                   |
| 4     |            |                   |
| 5     |            |                   |

**Benthic parasiticides residue levels**

| Agent | Agent Name | Residue level |
|-------|------------|---------------|
| 1     |            |               |
| 2     |            |               |
| 3     |            |               |
| 4     |            |               |
| 5     |            |               |
