

# Mowi ASC report

| Overview                                          |                                     |
|---------------------------------------------------|-------------------------------------|
| Business unit                                     | Mowi ASA region South               |
| Site                                              | Utåker                              |
| ASC status                                        | Certified, <a href="#">ASC02750</a> |
| 1st certification date                            | 31.08.2023                          |
| Start of production cycle                         | 26G-3 = 24.03.2026                  |
| Date of last update                               | 22.10.2026                          |
| Wildlife interactions – Birds                     | 3                                   |
| Wildlife interactions – Mammals                   | None                                |
| Estimated unexplained loss (EUL) <sup>1</sup>     | 25G = -1 458 (-0,11%)               |
| Suspicion of unidentifiable transmissible agent   | None                                |
| Detection of OIE <sup>2</sup> -notifiable disease | None                                |
| Number of escaped fish                            | None                                |

| WILDLIFE INTERACTIONS <sup>3</sup> |   |                                                   |                   |
|------------------------------------|---|---------------------------------------------------|-------------------|
| Lethal incidents - Birds           |   |                                                   |                   |
| Date                               | # | Species                                           | Cause             |
| 03.06.2024                         | 3 | European herring gull ( <i>Larus argentatus</i> ) | Stuck in bird net |
| Total birds                        | 3 |                                                   |                   |
| Lethal incidents - Mammals         |   |                                                   |                   |
| Date                               | # | Species                                           | Cause             |
|                                    |   |                                                   |                   |
| Total Mammals                      | 0 |                                                   |                   |

| SEA LICE COUNTS               |                            |
|-------------------------------|----------------------------|
| Sensitive period <sup>4</sup> | Week 16 – 21               |
| Lice levels                   | <a href="#">Click here</a> |

| TREATMENTS       |                            |
|------------------|----------------------------|
| See barentswatch | <a href="#">Click here</a> |

<sup>1</sup> Calculated at the end of the production cycle as: EUL = Stocking count – harvest count – mortalities – other known escapes.

<sup>2</sup> OIE is the World Organization for Animal Health.

<sup>3</sup> We do what we can to minimize our impact on wildlife, but unfortunately it may happen that we find dead birds or other animals in or near our sites.

<sup>4</sup> Sensitive periods refers to the outmigration of juvenile wild salmonids
