Operational EBIT Salmon of Norwegian Origin
Q3 2023 vs Q3 2024

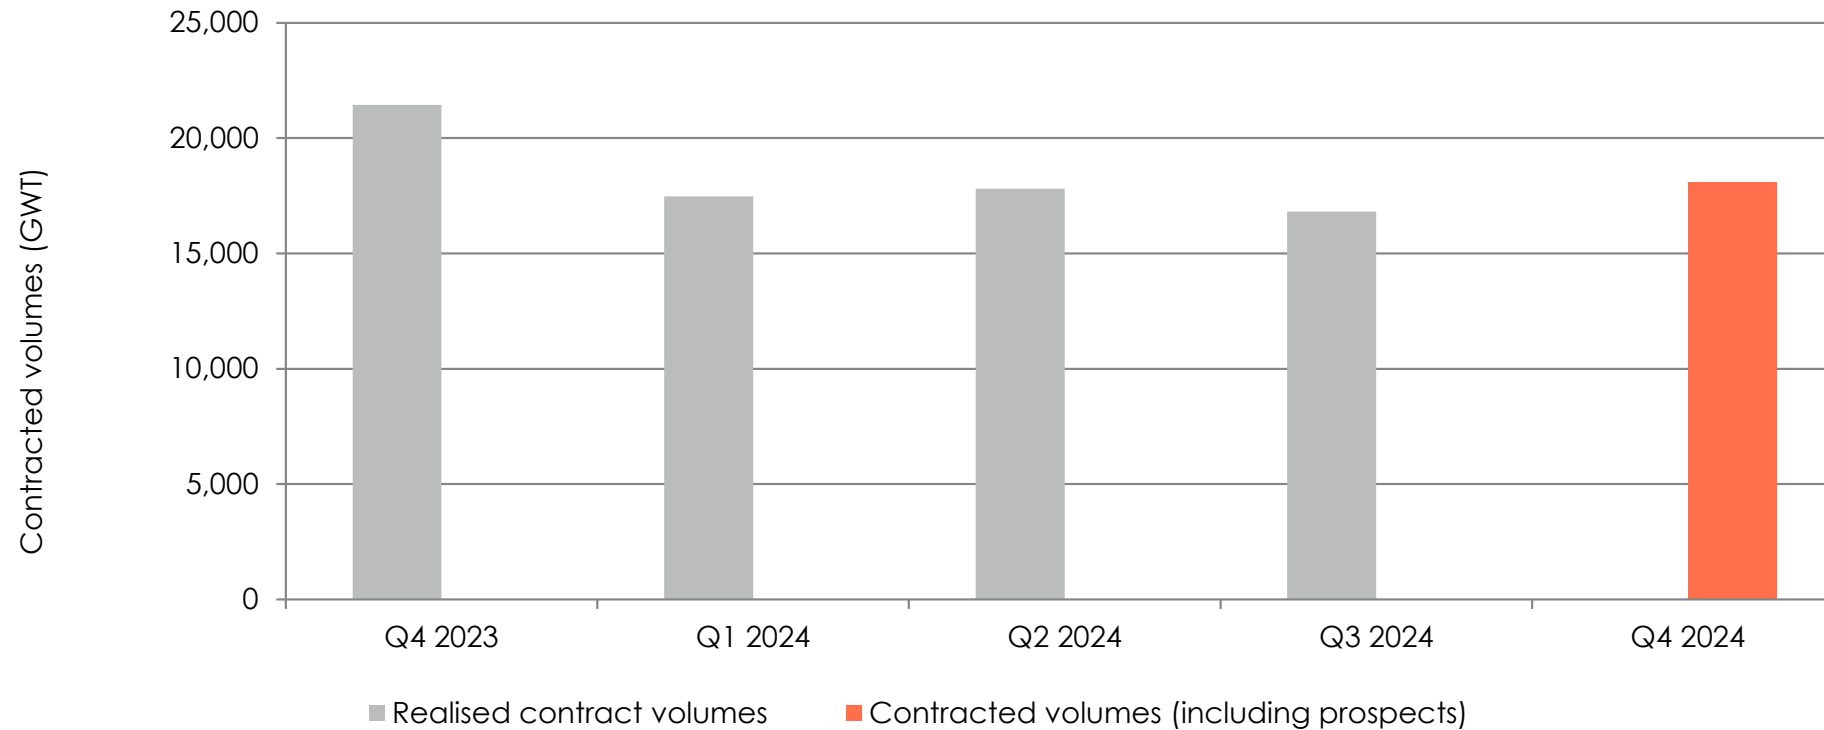

- Record high harvest volumes of 106k GWT
- Earnings impacted by reduced market prices
- Cost relatively stable YoY, although negatively impacted by gill/lice issues on record-high sea temperatures from Central Norway and northwards
 - Biological issues lingered on into October before improving in November
 - Only sporadic cases of string jellyfish so far in Q4 (isolated to Region Mid)
- FX hit in the wake of the unprecedented weakening of the NOK last year and a long accounting cycle cost Mowi Norway EUR 18 million or EUR/kg 0.17 vs Norwegian peers in Q3 (adj. EBIT/kg EUR 1.55)

Norway: Operational EBIT/kg per region

- Region South: Good performance and improved operational and biological metrics
- Region West: Another good quarter
- Region Mid: Negatively impacted by gill issues and increased lice pressure compounded by record-high sea temperatures
- Region North: Operational and biological performance impacted by record-high sea temperatures and lice pressure

Norway: Sales contract portfolio

- 16% contract share for the third quarter
- 21% contract share for the fourth quarter

Share of sustainable funding

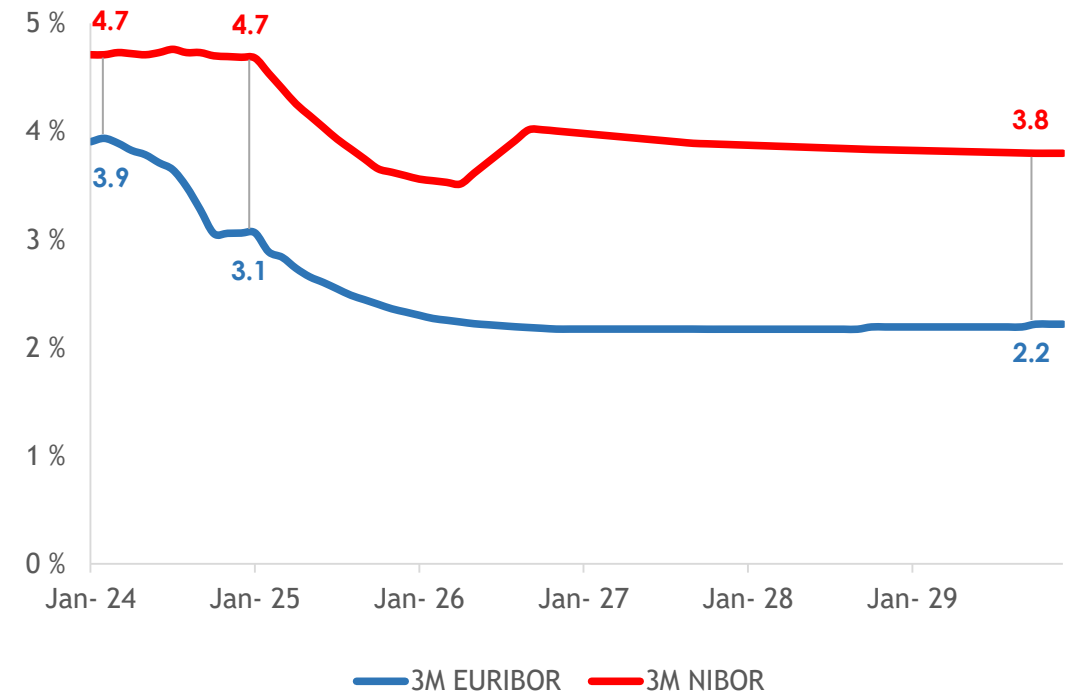

Lower EUR interest rates to reduce financing cost going forward

EUR financing is superior to NOK funding in terms of cost and hedging (25 years consistent track record)

- Mowi's financing is in EUR
- Currently, 100% floating rate
- To capitalise on lower forward interest rates by approx EUR 25 million in 2025e
- Historically a significant advantage to be financed in EUR than in NOK (25 years consistent track record)
 - Cash flow in EUR (removes FX fluctuations / risk)
 - Consistently lower EUR rates vs NOK rates, saved approx EUR 105 million over the past decade
- Supports a lower WACC for EUR financing than NOK financing

- Europe: Strong retail developments in the major markets, and stable foodservice
- US: Still below trend demand developments – should work itself out in due course (US consumption growth of 5% CAGR past 5 years, almost double global growth)
- Brazil: Continued strong growth in foodservice segment
- China/Hong Kong. Growth across all markets

Mowi Farming volumes versus indexed listed peers since 2018

Mowi has good track record for delivering on volume guidance last 5 years

- Mowi has a good track record for delivering on volume guidance in the last 5 years
- Listed peers -7.9% vs guidance

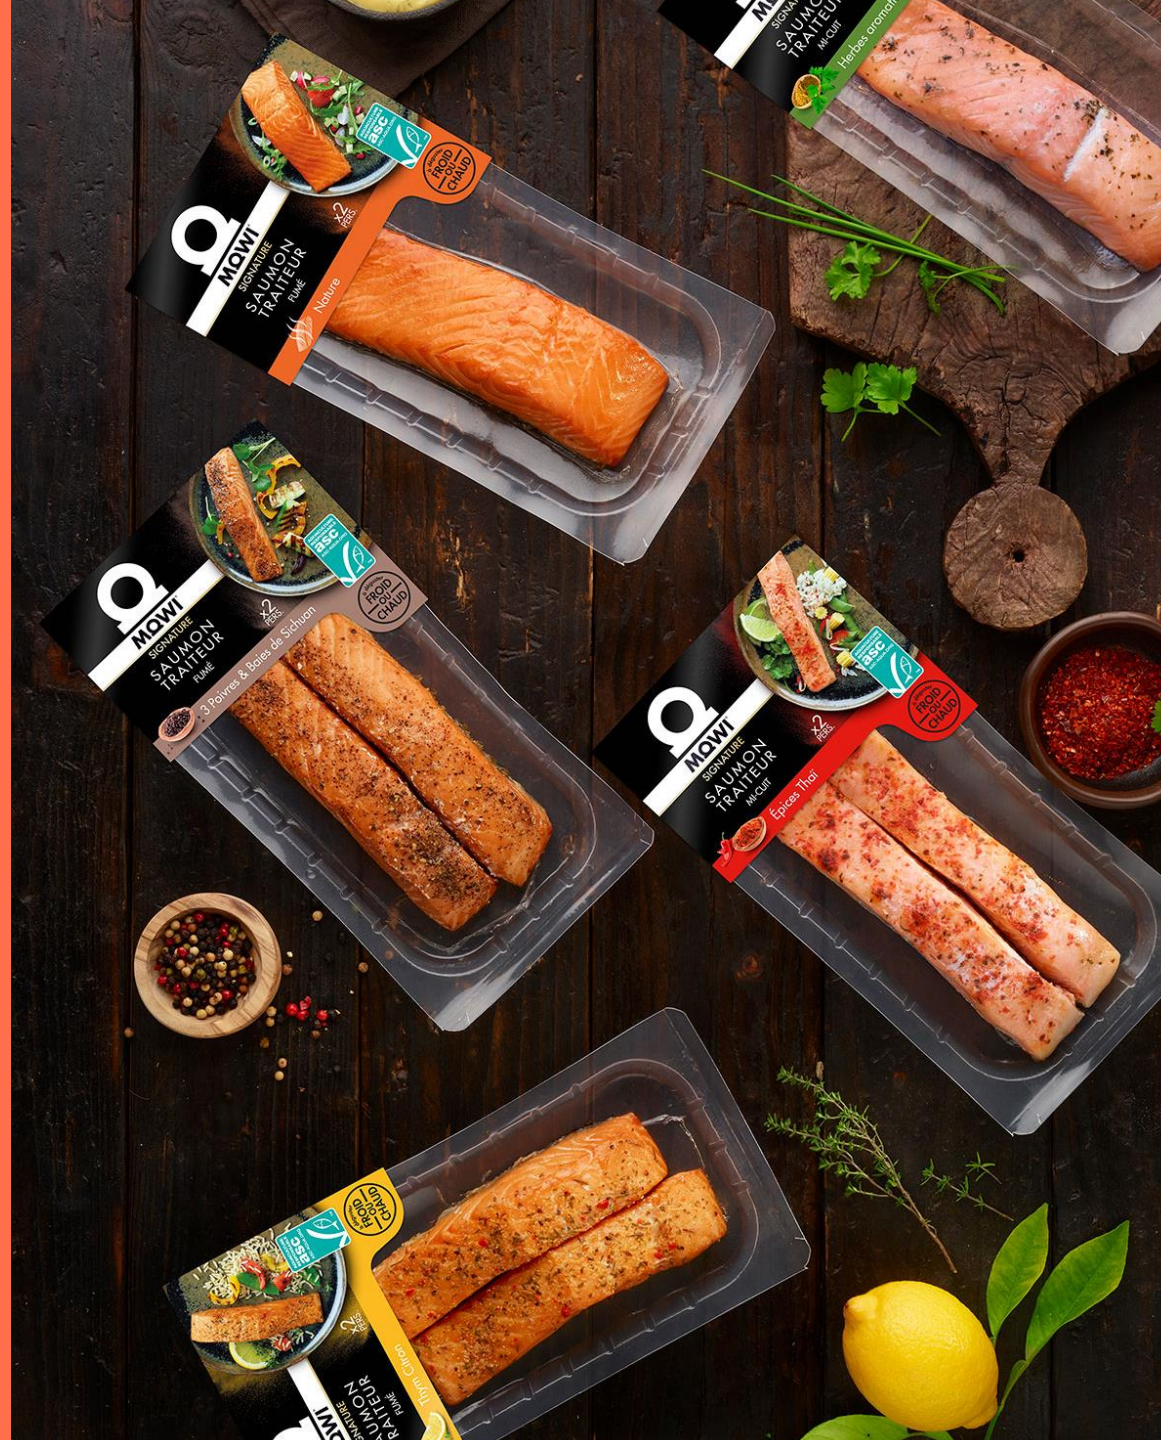

Outlook

- Maintaining 2024 farming volume guidance of record-high 500k GWT (Δ 5.3% Y/Y)
 - Milestone achievement
- Mowi harvest volume guidance of 520k GWT in 2025 (Δ 4.0% Y/Y)
 - First step towards next volume milestone of 600k GWT in 2029
 - Since 2018 growth of 145k GWT (equivalent to CAGR of 4.8% vs industry at 2.7%)
- Expecting tighter supply/demand balance in the coming months
 - 2% supply growth 2025e, downside risk
- Realised blended farming cost in Q4 is expected to be on a par with, or lower than, that of the third quarter depending on biological cost
 - Lower feed prices to further impact realised cost positively

Dividend policy

- Mowi's ambition is to create long-term value for the shareholder through both positive share price development and a growing dividend in line with long-term earnings
 - Quarterly ordinary dividend shall under normal circumstances be at least 50% of underlying earnings per share (EPS)
 - Excess capital will be paid out as extraordinary dividends
- When deciding excess capital the Board of Directors will take into consideration expected cash flow, capital expenditure plans, financing requirements and appropriate financial flexibility. Further to this a long-term target level for net interest-bearing debt is determined, reviewed and updated on a regular basis
- Shareholder returns are distributed primarily as cash dividends with the option of using share buybacks as a complementary supplement on an ad-hoc basis

CMD: Further improve our cost-leading position in the seven countries where we operate

- Mowi #1 or #2 on cost in every farming country
- Cost-cutting initiatives are important to combat inflation, biological measures, and more complex regulations
- Biology and operational performance the main cost drivers
 - Biology expected to widen the gap between good and bad performers
 - Focus on continued operational improvements
 - Positive cost effects from postsmolt programme and Mowi 4.0 in the coming years
- Other important cost measures
 - Cost Savings Programme
 - Productivity Programme on FTEs

Note: OP EBIT/kg all-inclusive 2018-2023. Industry average excluding Mowi. "Other" includes Mowi Ireland and Arctic Fish versus Icelandic peers

CMD: Strong focus on cost containment and cost leadership

Postsmolt

- Less treatments
- Reduced mortality
- Better FCR
- Positive scale effects from higher volumes

Mowi 4.0 Farming

- Improved FCR
- Lower health cost
- Other cost improvements

Cost Savings Programme

- Cost control
- Standardisation
- Reduce cost variation between entities
- Life cycle analyses
- Category management

Productivity Programme on FTEs

- Continued strict FTE focus
- Realise further productivity improvements

Mowi 4.0 Sales & Marketing

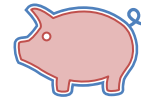

- Efficiency
- Yield
- Automation
- Smart processing technology

Our strategic programmes of *Postsmolt* and *Smart Farming* are improving biological metrics and will improve fish survival and welfare

Postsmolt strategy

Reduce the time spent in sea by up to six months, substantially improving biological KPIs

Smart Farming

Unprecedented visibility and control underwater

Vaccination

100% vaccination; only approved veterinary medicines are used; no prophylactic use of antibiotics

Optimal feed and feeding

Ensuring optimal feed and feeding procedures

Fish behaviour

Use of underwater cameras for behavior observations

Handling and transport

Gentle handling and transport following best practices

Ensuring good fish welfare

Training

100% trained staff; dedicated fish health and welfare team

Stunning and slaughter

100% percussive stunning; trained staff

Certification

100% certified with either ASC, BAP or Global GAP, all addressing animal welfare

Supply chain

Relevant suppliers required to follow fish welfare standards; included in Code of Conduct

Reporting

Operational Welfare Indicators monitored and reported publicly

R&D

Continuous improving on testing and verifying new farming, technological and health solutions
